

August 29, 2016 – VOLUME 13, ISSUE 8

Taking the Top Off the Ticket

ACPPA's Analysis of How Your Representatives and Senators Voted on Issues that Matter to the Industry

The 2016 presidential election campaign has been full of surprises. Between the unforeseen rise of Republican presidential candidate Donald Trump and the expected, but tortuous and controversial, road to the Democratic nomination taken by Hillary Clinton, few could have predicted the events of this political cycle.

In the countless column inches, web posts and social media updates committed already to the wildness on top of the ticket, it can be easy to overlook the many congressional races vying for attention. With the entire House of Representatives and 34 Senate seats up for election on Nov. 8, conscientious voters must focus through the noise radiating from the presidential candidates and invest in their current and prospective members of Congress.

ACPPA's highest priority in Washington, D.C. is advancing legislation to strengthen federal water infrastructure programs. Unfortunately, this Congress has yet to cast any votes on drinking water or sewer bills. However, over the past two years, lawmakers in both chambers have voted on other issues of importance to ACPPA members, in particular highway funding, taxes, energy pipelines, and reigning in federal regulatory overreach.

Making an Informed Decision

The voting charts in this report card provide an objective measure of how lawmakers voted on those issues. These issues represent only a portion of each lawmaker's record for this Congress; the House and Senate combined to vote on hundreds of measures over the past two years. While the votes listed in this piece are important, there are of course other factors you should consider when casting your ballot in the upcoming election, such as a candidate's character, professional qualifications or positions on other issues that matter to you personally. ACPPA's analysis should neither be read as an endorsement of any candidate, nor as a statement of opposition to a lawmaker's reelection.

As you analyze this information, it is important to remember that legislation is rarely simple and almost never straightforward. While a bill may contain important provisions for a manufacturing or construction company, unrelated issues may cause a member of Congress to vote no. Finally, remember that not all members served the entirety of the 114th Congress. In these circumstances, their vote totals may be skewed because they cast fewer votes than their colleagues.

This chart provides a quick reference to allow you to see where your elected officials stood on issues that affect you professionally. When you encounter candidates on the campaign trail – place you will find them more and more over the next couple months – use this information as a starting point for a conversation with incumbents about why they voted as they did and to inquire of challengers how they would have acted had they been in office. When you reach the ballot box or step into the voting booth, remember how they've represented your interests.

ACPPA Legislative Scorecard – 114th Congress – About the Bills

Votes in the House of Representatives

1. *Surface Transportation Reauthorization & Reform Act (H.R. 22)*

House Vote: 114-1-624, Nov. 5, 2015 (as “STRR Act”)
Senate Vote: 114-1-260, July 30, 2015 (as “DRIVE Act”)
ACPPA Position: Yes

Following consideration of more than 100 amendments, the House approved its version of a highway reauthorization bill - the Surface Transportation Reauthorization & Reform (the STRR Act), 363 to 64. The legislation provided \$325 billion for roads, bridges and transit infrastructure. However, under the bill, the duration of the authorization – six years or three – would depend on Congress' ability to come up with a way to pay for the final three years. Similar to the Senate-passed DRIVE Act (see discussion in Senate Vote #1), which provided three-years of guaranteed investment in a six-year authorization, the STRR Act was essentially a three-year proposal. The STRR Act's passage resulted in the appointment of a House-Senate conference committee to determine the investment blueprint's exact duration and funding levels.

2. *FAST Act (H.R. 22)*

House Vote: 114-1-673, Dec. 3, 2015
Senate Vote: 114-1-331, Dec. 3, 2015
ACPPA Position: Yes

Following conference committee negotiations to reconcile differences between the House (STRR Act) and the Senate (DRIVE Act) surface transportation reauthorization proposals, conferees agreed to the Fixing America's Surface Transportation (FAST) Act, a five-year transportation authorization bill. On Dec. 3, 2015, the House overwhelmingly passed the FAST Act, 359-65.

3. *Keystone XL Pipeline Approval Act (S. 1)*

House Vote: 114-1-75, Feb 11, 2015
Senate Vote: 114-1-49, Jan. 29, 2015
ACPPA Position: Yes

While the Keystone XL Pipeline's construction was expected to create thousands of jobs and stimulate significant economic activity, the Obama administration delayed approval (and eventually rejected it) because of perceived environmental concerns. The Keystone XL Pipeline Approval Act (S. 1) would have superseded

presidential authority to issue the Keystone XL pipeline's permit. It passed the House with bipartisan support (270 - 152) and the Senate, but the bill was vetoed by President Obama and the efforts supporters didn't have a two-thirds majority in both the House and Senate to override it.

4. *PATH Act (H.R. 2029)*

House Vote: 114-1-703, Dec. 17, 2015

Senate Vote: 114-1-339, Dec. 18, 2015 (Combined vote with Consolidated Approps Act)

ACPPA Position: Yes

Despite promising to complete work to reinstate expired business tax provisions early in 2015, lawmakers once again waited until the end of the year to consider a tax extenders package. However, it was worth the wait as Congress approved the Protecting Americans from Tax Hikes (PATH) Act, which temporarily reinstated bonus depreciation and permanently increased and indexed Sec. 179 expensing levels. The House approved the PATH Act, 318-109.

5. *"Devolution" Amendment to FAST Act Proposed by Rep. DeSantis of Florida (H. Amdt. 802)*

House Vote: 114-1-606, Nov. 4, 2015

Senate Vote: None

ACPPA Position: No

While not as prevalent as the last Congress, once again, proponents of reducing the federal role in surface transportation investment attempted to attach harmful amendments to highway reauthorization legislation. Rep. Ron DeSantis (R-Fla.) sought to amend the STRR Act with a "sense of Congress" (a non-binding resolution) declaring "it is critical for Congress to phase down the federal gas and diesel taxes and empower the states to tax and regulate their highway and infrastructure projects." The amendment, while not obligatory, was viewed by the business community and transportation advocates as a dangerous step toward full devolution of the federal highway program. The resolution was defeated handily, 310-118.

Votes in the Senate

1. *DRIVE Act (H.R. 22)*

House Vote: 114-1-624, Nov. 5, 2015 (as "STRR Act")

Senate Vote: 114-1-260, July 30, 2015

ACPPA Position: Yes

In a bipartisan effort during a congressional session marred by partisanship and gridlock, Senate Majority Leader Mitch McConnell (R-Ky.), Environment & Public Works (EPW) Committee Chairman Jim Inhofe (R-Okla.), EPW Ranking Member Barbara Boxer (R-Calif.) and others, pushed through the Senate the Developing a Reliable and Innovative Vision for the Economy Act (DRIVE Act), a six-year highway reauthorization bill. The legislation would have modestly increased annual funding for surface transportation infrastructure, but provided only three years of guaranteed revenue to give lawmakers time to identify a long-term Highway Trust Fund solution. While the DRIVE Act didn't become law, the effort is credited with

pressuring the House to complete work on its own highway reauthorization bill, which ultimately led to the FAST Act enactment later in the year. (see House/Senate Vote #2).

2. FAST Act (H.R. 22)

House Vote: 114-1-673, Dec. 3, 2015
Senate Vote: 114-1-331, Dec. 3, 2015
ACPPA Position: Yes

See discussion under House Vote #2. The Senate approved the FAST Act, 83-16.

3. Keystone XL Pipeline Approval Act (S. 1)

House Vote: 114-1-75, Feb 11, 2015
Senate Vote: 114-1-49, Jan. 29, 2015
ACPPA Position: Yes

See discussion under House Vote #3. The Senate approved the KXL Pipeline Approval Act, 62 – 36.

4. Consolidated Appropriations Act of 2016 and PATH Act (H.R. 2029)

House Vote: 114-1-705, Dec. 18, 2015 (Consolidated Approps Act); 114-1-703, Dec. 17, 2015 (PATH Act)
Senate Vote: 114-1-339, Dec. 18, 2015
ACPPA Position: Yes

Government funding battles headlined President Obama's White House tenure and the 114th Congress was no exception. With the appropriations process broken, Congress needed to pass legislation funding the federal government before leaving for 2015. The so-called "omnibus" appropriations bill, a \$1.1 trillion spending bill to keep the government open through Sept. 30, 2016, was the bookend to one of the most productive congressional months in recent memory (FAST Act, PATH Act, and omnibus all passed in just over two weeks). The omnibus passed the House, 316-113, and was combined with the PATH Act before the Senate approved the package, 65-33. See PATH Act discussion under House Vote #4.

5. Joint Resolution Disapproving of the Rule Redefining "Waters of the United States" (S.J. Res. 22)

House Vote: 114-2-45, Jan. 13, 2016
Senate Vote: 114-1-297, Nov. 4, 2015
ACPPA Position: Yes

In what has become the epitome of the Obama administration's out-of-control regulatory agenda, on May 27, 2015, the Environmental Protection Agency (EPA) and the Army Corps of Engineers issued their final "waters of the United States" rule, significantly expanding federal jurisdiction under the Clean Water Act (CWA). The new rule gives the EPA expansive new powers to regulate development, farming, mining and other activity in large swaths of the country. While the regulation has been challenged in court, Congress attempted to bring clarity to the situation by preventing the rule's implementation. A joint congressional resolution was approved by the House (253-166) and the Senate (53-44). However, it was vetoed by President Obama and the efforts supporters didn't have a two-thirds majority in both the House and Senate to override it. 

ACPPA Legislative Scorecard – 114th Congress – How they Voted

Reading the vote chart.

Y = Agreed with ACPPA's Position

N = Disagreed with ACPPA's Position

X = Did not vote

Score = Percentage agreement with ACPPA's position.

Pressure Pipe Post

ACPPA's Monthly Source for Industry News

August 2016

To keep members aware of the activities of government and standards organizations, we regularly sweep public databases and publications for the industry-specific terms indicated below. We then provide our members with links to documents identified in the search. Please note that in some cases the URLs may link to subscription-only databases. The purpose of this service is to identify emerging threats and trends as well as opportunities for collective action by ACPPA.

Drinking Water

Binghamton Drinking Water Passes Independent Lead Test

08/25/2016 <http://www.wbng.com/news/local/Binghamton-drinking-water-passes-independent-lead-test-391338141.html>

Binghamton Mayor Rich David (R) released data from independent tests of the city's municipal water supply. They showed lead and copper levels are in compliance with federal water quality standards.

Don't Freak Out About the Pipes and Gushing Hydrants Along Dilworth's Sidewalks

08/24/2016 <http://www.charlottefive.com/pipes-gushing-hydrants-along-dilworths-sidewalks/>

If you bike, walk, jog or breathe around Worthington and Tremont avenues in Dilworth, you've noticed the piping that extends for blocks. You've probably also noticed intermittent puddles, gushing fire hydrants and signs with phrases like: "FLUSHING FOR WATER QUALITY."

Expert: Red Water is Part of Life with Galvanized Pipe, but Some Fresno Lead Fears are Overblown

08/20/2016 <http://www.fresnobee.com/news/local/article96813422.html>

One of the nation's leading experts in corrosion problems in public water supplies said that despite considerable concern over discoloration of water coming from galvanized pipes in a growing number of northeast Fresno homes, "at present there's really no indication at all that there's a lead problem" in the city's water under federal law.

To Get Threat of Lead Out of Water, Fresno Council Bans Galvanized Pipes

08/18/2016 <http://www.fresnobee.com/news/local/article96523407.html>

Fresno will join several other major California cities to ban the use of galvanized pipe for plumbing in new residential and commercial construction and major renovation work.

A Brief Introduction to Water Law

08/01/2016 http://www.huffingtonpost.com/brad-reid/a-brief-introduction-to-w_b_11295926.html

Fresh drinkable water is an essential but limited resource. This comment provides a brief and incomplete educational introduction to water law. Always consult an experienced attorney in natural resource legal situations.

Fly Ash**Fly Ash Spilled in Knowlton**

08/22/2016 <http://wsau.com/news/articles/2016/aug/22/fly-ash-spilled-in-knowlton/>

A truck carrying fly ash left the roadway in Knowlton on Monday morning. Part of its load was dumped onto private land.

Company to Clean Up Old Ash Ponds

08/18/2016 <http://www.newtondailynews.com/2016/08/17/company-to-clean-up-old-ash-ponds/a55vz5e/>

An energy company says it plans to start cleaning up four of the ash ponds underneath an interstate in Cedar Rapids ahead of a planned beautification project at Cedar Lake.

Employees Prepare to Close Coal-Fired Power Plant in Stanton

08/14/2016 http://www.aberdeennews.com/wire/ap-state-nd/employees-prepare-to-close-coal-fired-power-plant-in-stanton/article_e5dafcd3-a443-5f6d-aed4-dada7d0af917.html

One of the oldest coal-fired power plants in North Dakota has been evolving since the first day it opened for business back in the mid-'60s.

Heat Release of Later-Age Concrete and the Concrete Strength Development

08/10/2016 <http://www.sciencenewsline.com/news/2016080916240010.html>

The adiabatic temperature rise of early-age concrete can be precisely tested by an adiabatic temperature measuring device. There are many types of those devices, with the only objective to make the specimen's ambient temperature equal to the central temperature. However, the insufficient accuracy of testing device can lead to inaccurate measurements of adiabatic temperature rise of later-age concrete.

Looking for a Breakthrough in Cement and Concrete

08/09/2016 <http://www.greenbuildingadvisor.com/blogs/dept/guest-blogs/looking-breakthrough-cement-and-concrete>

The toughest climate challenges involve large global industries, with no good substitutes. One of these literally produces the material under our feet — concrete. Every year, each of us in the U.S. uses about one-third of a ton.

Coal Ash Management Forum Offers Insight into Industry Perspectives

08/05/2016 <http://blog.cleanenergy.org/2016/08/05/coal-ash-management-forum-offers-insight-into-industry-perspectives/>

SACE staff attended the Coal Ash Management Forum in Charlotte, NC. The forum was organized by the Environmental Research and Education Foundation (EREF) which funds research on waste management practices.

Five Key Takeaways from a WTE Ash Management Report

08/02/2016 <http://waste360.com/waste-energy/five-key-takeaways-wte-ash-management-report>

One of the most surprising finds in the research is that the recovery of metals from WTE bottom ash can play a significant role in a community's recycling program.

Pipes & Pipelines**Massive 1,170-Mi. Dakota Access Pipeline Under Way**

08/26/2016 <http://www.constructionequipmentguide.com/massive-1170-mi-dakota-access-pipeline-under-way/30457>

Across a spattering of states, crews are working on a more than 1,170-mi. (1,882 km) 30-in. (76.2 cm) diameter pipeline that, when complete, will transport crude oil from the North Dakota Bakken region through South Dakota and Iowa into Illinois.

Dakota Access Pipeline Tensions Grow Increasingly Hostile As Officials Cut Off Water Supply, Arrest Dozens

08/25/2016 <http://www.zerohedge.com/news/2016-08-24/dakota-access-pipeline>

An ongoing protest by Native American members of the Standing Rock tribe, intended to halt the construction of the Dakota Access Pipeline, got a little celebrity "love" today in Washington D.C.

Pipeline Almost Through Lee County

08/24/2016 http://www.dailygate.com/news/article_ed2ccef6-6a11-11e6-8b43-f7dbdfc1d22b.html

Ryan Drenner of Chippewa Resources in Denver, Colo., gave the Lee County Board of Supervisors, elected officials and several members of the media a tour Tuesday of work being done by Dakota Access.

Editorial: Public Pushed Aside by Pipeline

08/17/2016 <http://www.ocala.com/opinion/20160817/editorial-public-pushed-aside-by-pipeline>

Construction of the controversial Sabal Trail natural gas pipeline was given final federal approval last week, ending nearly three years of spirited and sustained opposition from residents, environmentalists and state and local governments along its 516-mile route. In the end, the public's fears seemed to matter little.

Officials Celebrate Start of New Pipeline in Arkansas

08/10/2016 <http://newsok.com/officials-celebrate-start-of-new-pipeline-in-arkansas/article/feed/1054447>

Arkansas officials are celebrating the opening of a \$200 million, 210-mile pipeline that will transport gasoline, diesel and jet fuel into the state.

Water & Underground Infrastructure**Parsons-CH2M JV to Support Water Infrastructure Program in Washington**

08/25/2016 <http://www.govconwire.com/2016/08/parsons-ch2m-jv-to-support-water-infrastructure-program-in-washington/>

A joint venture of Parsons and CH2M will provide services for the repair of underground water infrastructure in Washington, D.C., and surrounding areas under a five-year contract from the District of Columbia Water and Sewer Authority.

Underground Radar Used to Locate Post-Katrina Damage

08/25/2016 <http://www.rdmag.com/news/2016/08/underground-radar-used-locate-post-katrina-damage>

An innovative underground radar technology developed at Louisiana Tech University is helping the City of Slidell in south Louisiana to identify and document underground infrastructure damage that had gone undetected in the months and years following Hurricane Katrina.

China Pushes Underground Drainage System Construction

08/24/2016 http://usa.chinadaily.com.cn/china/2016-08/24/content_26583551.htm

The central government on Wednesday called for faster construction of upgraded drainage systems across the country to cope with urban flooding.

Water and Sewer Improvement Work Underway

08/22/2016 <http://wamc.org/post/water-and-sewer-improvement-work-underway>

Work started Monday at the first of nearly two-dozen locations in the city of Springfield where improvements are planned this year to an urban water and sewer infrastructure, parts of which date back to the 1800s.

PMI Advocates Water Infrastructure Restoration

08/22/2016 <http://mechanical-hub.com/pmi-advocates-water-infrastructure-restoration>

In the first step of a committed advocacy effort for the safety and sustainability of America's drinking water, Plumbing Manufacturers International (PMI) introduced a position statement and infographic advocating for the restoration of the United States' underground water infrastructure.

Wrightsville Beach Leaders to Discuss Need for Redundant Sewer Line

08/09/2016 <http://luminanews.com/2016/08/wrightsville-beach-leaders-to-discuss-need-for-redundant-sewer-line/>

During an Aug. 11 meeting, Wrightsville Beach leaders and staff will discuss the need for a duplicate town sewer line due to the condition of the current one, a 14-inch, 30-year-old pipe that transports all the island's sewage underneath the Intracoastal Waterway to be treated on the mainland.

Developers Laud Easing of Cast-Iron Pipe Reg

08/02/2016 <http://www.courier-journal.com/story/news/local/2016/08/02/developers-laud-easing-cast-iron-pipe-reg/87962562/>

The State Plumbing Code Committee has voted to suspend a decades-old rule that business leaders and developers had long viewed as a major impediment to investing in major construction projects.

Push for Program to Fix Aging Underground Infrastructure Issues

08/01/2016 <http://news10.com/2016/08/01/push-for-program-to-fix-aging-underground-infrastructure-issues/>

In light of recent sewer breaks in Amsterdam, plus multiple water main breaks and other infrastructure issues in recent months, one local lawmaker wants change.

Wastewater**Lake St. Clair Beach Closures Reflect Big Problem with Sewage**

08/26/2016 <http://patch.com/michigan/rochester/s/fv3xr/lake-st-clair-beach-closures-reflect-big-problem-with-sewage-watch>

There's an old maxim that describes an ongoing situation at Lake St. Clair's beaches. For decency's sake, let's just call the on-again, off-again closures of the popular beaches a "same story, different day" kind of tale.

Your Drain on Drugs: Meth Seeps into Baltimore's Streams

08/25/2016 <http://www.kmjnow.com/news/your-drain-on-drugs-meth-seeps-into-baltimores-streams/>

You shouldn't put illegal drugs in your body, and you shouldn't let neighborhood bodies of water ingest them, either. A new study suggests that aquatic life in Baltimore is being exposed to drugs, and it's having an impact.

REGULATORY RESULTS**Fly Ash****Tennessee Valley Authority | Record of Decision | Ash Impoundment Closure Final Environmental Impact Statement Part I Programmatic Review and Part II Site Specific Review of 10 Ash Impoundments**

08/05/2016 <https://www.gpo.gov/fdsys/pkg/FR-2016-08-05/pdf/2016-18600.pdf>

TVA has decided that the environmental and other factors identified in part I for screening and evaluating closure alternatives on a site specific basis are appropriate for use in its future decision-making processes involving the proposed closure of CCR impoundments. It also has decided to implement the preferred closure alternatives identified for each of the site-specific evaluations in part II. The Notice of Availability (NOA) of the Final Ash Impoundment Closure EIS, Part I Programmatic NEPA Review and Part II Site Specific NEPA Reviews was published in the Federal Register on June 10, 2016.
